What can made your songs have a final push and allow you to make a living with music?

t's not a secret, moreover, it's the same method as 90% of the bands you thar you are currently following or listening, and it's no other than looking for someone totally outside the band, with experience and professionalism, who understands what you wanted to express with my music and maximize it.

The musicians have inclination to blind ourselves with our art, thinking our work is perfect and untouchable, making follies that many times can ruin our songs.

That's why someone outside the band is needed, someone who understands your music, style, the musical concept you are trying to find, the purpose of yourwork, your sound, etc..., enhancing your strengths, correct your defects, and achieves the perfect sound and climate for your music.

This figure, is us.

Starting from your ideas and the approach of your song and your musical style, we propose you the necessary changes to maximize what you want to express and make it reach a wider audience.

We present you some of our works so that you can notice how our producers work and get an idea of what we can do for you.
